

## Zotero RDF export

First, right-click on the folder with the collection you'd like to export and choose the “Export Collection” option.

Then choose “Zotero RDF” as the Format, check “Export Note” and “Export Files”, and then press okay.

You will then be able to choose the folder you want to export the documents to.

## Zotero RTF Export

You should also export your bibliography as an RTF (Rich Text File). To do so, you should also right click on the appropriate folder in Zotero and choose the “Export Collection” option. Then you can select the Style as “American Chemical Society”. Pressing “OK” will guide you to where you can save the file.
